WHAT DOES “AUF DEN WEG” CONSIST OF?

READING LEVEL LOGOS
ARE REPRODUCED ON
THE BACK OF EACH BOOK
COVER AND INSIDE THE
BACK COVER.

Auf den Weg is a German guided reading program especially developed for children who are starting to learn German in kindergarten or grade 1. The books are leveled according to Fountas & Pinnell plus Reading Recovery levels. High frequency words are introduced at a slow rate and subsequent books build on earlier books as they gradually increase in complexity.

All of the themes in the books are based on early childhood experiences such as school, family, jobs, pets and dress up. The themes pertain particularly to Hutter-

ite children, but are universal, based on typical childhood experiences.

The books were carefully crafted by Kathy Waldner, an Early Years educator with over seventeen years experience teaching both German and English Language Arts. Each book was revised under the guidance of an experienced Reading Recovery teacher.

In addition to these features, the front cover of each book contains a book introduction and a suggested reading strategy suitable for the particular reading level. Additional word working ideas and writing ideas are also included.

TEACHER'S GUIDE FOR LEVELS A - C INCLUDES:

The teaching guide for the first levels outlines the important components of balanced literacy for emergent readers. It includes lesson plans, poems, printable alphabet activities, high frequency word lists, word games, alphabet booklets, assessments and associated activities to go with the earliest books.

WHAT TEACHERS ARE SAYING:

In the first level, easy, repetitive text helps students learn sight words in context. They use the words in their own speaking and writing and quickly feel successful when reading. Each activity is explained thoroughly, and also why it's an important element in learning to read. The photos and illustrations are precious. But they also do enhance the learning experience of the child, as they generate discussions, besides helping the students read the words."

Linda Maendel, author of Hutterite Diaries

"What a delight to finally have something that really, really works with beginning readers! Though I have now only used Stufe 1 of the books, with plans to add Stufe 2 and 3 in October, it is amazing how much the students progress in reading and writing with this program. My students just LOVE them and it seems as though the books just grab the students' attention and before they realize it, they have learned a new reading strategy and new sight words!"

Dennis Waldner, Plain View Community

"It makes me smile to see them enjoying reading and how they can't wait for each new book."

Krista Waldner, Good Hope Community
